2027 International Conference

SUSTAINABLE DEVELOPMENT OF MIDDLE-SIZED CITIES AND URBAN REGIONS IN CENTRAL-EUROPE

Győr, Hungary

April 8 th to 10 th 2027

SUSTAINABLE DEVELOPMENT OF MIDDLE-SIZED CITIES AND URBAN REGIONS IN CENTRAL-EUROPE

The category of medium-sized cities is one of the most complex and, from a methodological standpoint, constantly debated areas in geography, regional science, or urban studies. Although population-based definitions vary widely (from 50,000 to as many as 1 million people), modern research increasingly emphasises functional relationships rather than demographic indicators. In the European context, medium-sized cities are not independent entities but rather the centres of their urban regions and agglomerations; as key players in polycentric networks, they fundamentally shape regional development and the mitigation of territorial inequalities.

Will the 21st century bring about the rise of mid-sized cities? While the growth of metropolises is often accompanied by overcrowding and environmental strain, mid-sized urban areas have the potential to become new hubs of sustainability, quality of life, and economic resilience. Our conference focuses on the “invisible majority”: those urban areas where nearly half of Europe’s population lives, yet which are often overlooked by development policy.

The conference aims to compare Central European experiences with international trends. In Central Europe, mid-sized cities exhibit a unique duality. While they are significant in terms of population, their functional strength is greatly influenced by whether a given country has a monocentric or polycentric structure. We will examine why medium-sized cities have remained functionally weak in monocentric systems (such as in Hungary) and what we can learn from more decentralised models (such as those in Germany or the Czech Republic).

The goal of our conference is to explore the 21st-century opportunities facing mid-sized cities - from a sustainable environment to advanced infrastructure - that make these regions attractive destinations for investment and residence. It provides a platform for multidisciplinary discussion of urban regions, polycentric networks, and issues specific to mid-sized cities. We welcome applications from researchers and professionals who analyse, from theoretical or practical perspectives, the urban-network positioning of mid-sized cities, their sustainability issues, their rural connections, and their development trajectories, drawing on European or global experiences.

CONFERENCE VENUE

GYŐR, HUNGARY

The conference will be held at the West Hungarian Research Department, Institute for Regional Studies, ELTE Centre for Economic and Regional Studies in Liszt Ferenc street 10., H-9022 Győr. The institute is located in Győr's historical centre.

Győr is a historic city located in north-western Hungary, at the confluence of the Danube, Rába and Rábca rivers. With a history dating back to Roman times, the city has developed into one of Hungary's most important regional centres, combining rich cultural heritage with a strong industrial and innovation profile. The well-preserved Baroque historic centre, the Bishop's Castle, and the numerous architectural monuments reflect Győr's significant role throughout Hungarian history. Due to its strategic location between Budapest and Vienna, Győr has long been a key hub for trade, transport, and cross-border cooperation in Central Europe. Today, it is one of Hungary's leading economic centres, particularly known for its automotive industry, universities, research activities, and international business connections.

Győr is located approximately 120 km from Budapest, Hungary's capital city, 125 km from Vienna International Airport (Austria), 80 km from Bratislava (Slovakia), and around 150 km from Vienna city centre. Its favourable geographical position within the Vienna–Bratislava–Budapest triangle makes Győr an important gateway between Western and Eastern Europe and a significant centre for regional development, innovation, and international cooperation. Further information on transportation, accommodation, and other practical matters will be available on the website.

IMPORTANT INFORMATION

DATES	EVENT
1st September 2026	Opening registration and abstract submission
30st November 2026	Deadline for abstract submission
15th December 2026	Notification of paper acceptance
15th January 2027	Early bird registration closes
31st January 2027	Deadline for optional full-paper submission for special issue of Romanian Journal of Geography (https://www.rjgeo.ro/index.html) and other collaborating journals*
1st March 2027	Registration closes
8th–10th April 2027	Conference

*Space and Society; Hungarian Statistical Review; Journal of Settlements and Spatial Planning; Journal of Region, Economy and Society; Regional and Business Studies;

SCHEDULE

8th April 2027	Arrival of participants
8th – 9th April 2027	Parallel sessions
9th April 2027	Half-day excursion in Győr
10th April 2027	Full-day excursion to the cities and towns of the Austrian–Hungarian border area

REGISTRATION FEE (without accommodation)

Registration	**Early Bird (EUR)**	**Standard (EUR)**
	From 01.09.2026 to 15.01.2027	**after 15.01.2027**
Regular participants	100	150
Younger scientists*	50	100
Accompanying persons	50	100

*Young scientists refer to PhD students and other persons aged up 35 years.

Registration fee includes: For regular and young scientists – participation in the conference; conference materials; coffee breaks and lunches; social dinner and half-day excursion. For accompanying persons – dinner and a half-day excursion Full-day excursion is not included.

EXCURSIONS

The conference program includes a half-day excursion. For an extra charge, conference participants may also take part in a full-day excursion.

1. Half-day excursion in the down-town of Győr

2. Full-day excursion to Sopron- Eisenstadt (A) - Lake Fertő – Mosonmagyaróvár

A walking tour of Sopron's downtown is famous for its remarkably well-preserved medieval Old Town, the iconic Firewatch Tower, and its rich historical heritage. Located near the Austrian border.

Eisenstadt, the capital of Austria's Burgenland province, is best known for the magnificent Esterházy Palace and its close association with the composer Joseph Haydn. Its elegant historic centre and cultural attractions make Eisenstadt a popular destination for history and music.

Lake Neusiedl /Lake Fertő is a unique steppe lake located on the Austria–Hungary border and recognised as a UNESCO World Heritage cultural landscape due to its exceptional natural and cultural values.

Mosonmagyaróvár is a historic town in north-western Hungary, located near the Austrian and Slovak borders, known for its medieval castle, charming old town, and rich cultural heritage**.**

INTERNATIONAL SCIENTIFIC BOARD

Jerzy Bański – Professor, Institute of Geography and Spatial Organization, Polish Academy of Sciences, former Chair of IGU CLRD, Poland

Wolfgang Fischer – Professor, Department of Geography and Regional Science, University of Graz, Austria

Ines Grigorescu – PhD, Senior Researcher, Institute of Geography, Romanian Academy, Chair of IGU CLRD, Romania

Tamás Hardi – Professor, ELTE Centre for Economic and Regional Sciences; Széchenyi István University, Member of the Steering Committee of the IGU CLRD, Hungary

Katalin Mezei – Head of Department, Associate Professor, Albert Kázmér Faculty of Agricultural and Food Sciences, Department of Regional Science and Rural Development, Széchenyi István University, Hungary

Bianca Mitrică – PhD, Scientific Secretary of the IGU CLRD, Senior Researcher, Institute of Geography, Romanian Academy, Romania

Radu Săgeată – Professor, Romanian Academy Institute of Geography, Human Geography & Regional Development, Romania

Milada Šťastná – Professor, Head of the Department of Applied and Landscape Ecology at Mendel University, Czechia

Michael Sofer – Professor, Department of Geography and Environment, Faculty of Social Sciences, Bar-Ilan University, Honorary Member of the IGU CLRD, Israel

Viktória Szirmai – Doctor of the Hungarian Academy of Sciences Széchenyi Prize-winning urban sociologist, Editor-in-Chief of City.hu Urban Studies Review, Hungary

Judit Tímár – Senior Researcher, ELTE Centre for Economic and Regional Studies, Hungary

Carmen Vazquez Varela – Professor, Department of Geography and Spatial Planning, University de Castilla-La Mancha, Vice-Chair of IGU CLRD, Spain

ORGANIZING COMMITTEE

Nóra Baranyai – Research fellow, ELTE Centre for Economic and Regional Sciences

Tamás Hardi (co-chair) – Professor, ELTE Centre for Economic and Regional Sciences; Albert Kázmér Faculty of Agricultural and Food Sciences, Department of Regional Science and Rural Development, Széchenyi István University

Boglárka Horváth-Barsi – Research fellow, ELTE Centre for Economic and Regional Sciences; Assistant professor, Albert Kázmér Faculty of Agricultural and Food Sciences, Department of Regional Science and Rural Development, Széchenyi István University

Petra Kinga Kézai (co-chair) – Research fellow, ELTE Centre for Economic and Regional Sciences; Assistant professor, Kautz Gyula Faculty of Economics Széchenyi István University

Marcell Kupi – Research fellow, ELTE Centre for Economic and Regional Sciences; Associate professor, Kautz Gyula Faculty of Economics Széchenyi István University

Katalin Mezei – Associate Professor, Head of Department, Albert Kázmér Faculty of Agricultural and Food Sciences, Department of Regional Science and Rural Development, Széchenyi István University

Andrea Pozsgai – Lecturer, Albert Kázmér Faculty of Agricultural and Food Sciences, Department of Regional Science and Rural Development, Széchenyi István University

Júlia Szőke – Associate professor, Vice-dean, Department of International Studies and Communication, Apáczai Csere János Faculty of Humanities, Education and Social Sciences, Széchenyi István University

Andrea Uszkai – Research fellow, ELTE Centre for Economic and Regional Sciences; Albert Kázmér Faculty of Agricultural and Food Sciences, Department of Regional Science and Rural Development, Széchenyi István University
